# Dualit®

## 18L Mini oven

---

Dualit's stainless steel mini oven is a compact addition to any kitchen and can make a big difference when catering for large numbers. Also ideal for small spaces though it's big on the inside, the mini oven heats from room temperature to 180°C in just three minutes.

---

### Double glazed door:

The mini oven's heavy duty glass door is double glazed for improved insulation. The large viewing area ensures maximum 'cook control' for puffed-up yorkshires or melt-in-the-mouth cakes

### Quick heat up time:

From a standing start to 180°C in just three minutes and 230°C in under five minutes, the fast heat-up time makes our mini oven the perfect solution for everyday meals

### Solo or complementary:

Whether you need extra capacity for a family feast, the ability to cook different dishes at the same time, or an oven that's perfect for small spaces and a meal for one or two

---

### Versatile:

With its defrost, grill, bake and convection cooking functions, our mini-oven is the perfect all-rounder

### Easy to clean:

Cleaning couldn't be easier with non-stick parts and full-width removable crumb/drip tray
